Lt. CARL DAY, Dallas Police Department, stated he found the brown paper bag shaped like a gun case near the scene of the shooting on the sixth floor of the Texas School Book Depository Building. He stated the manager, Mr. TRULY, saw this bag at the time it was taken into possession by Lt. DAY. TRULY, according to DAY, had not seen this bag before. No one else viewed it. TRULY furnished similar brown paper from the roll that was used in packing books by the Texas School Book Depository. This paper was examined by the FBI Laboratory and found to have the same observable characteristics as the brown paper bag shaped like a gun case which was found near the scene of the shooting on the sixth floor of the Texas School Book Depository Building. The Dallas police have not exhibited this to anyone else. It was immediately locked up by DAY, kept in his possession until it was turned over to FBI Agent DRAIN for transmittal to the Laboratory. It was examined by the Laboratory, returned to the Dallas Police Department November 24, 1963, locked up in the Crime Laboratory. This bag was returned to Agent DRAIN on November 26, 1963, and taken back to the FBI Laboratory.

Lt. DAY stated no one has identified this bag to the Dallas Police Department.

"THE CASE OF Q-10" or "THE FBI COVER-UP IS IN THE BAG"

---By Jack White

All students of the JFK case are familiar with "the curtain rod story." This is the allegation of the Warren Commission that Lee Harvey Oswald constructed a brown wrapping-paper bag or "gun case" to conceal the rifle he allegedly brought into the TSBD on November 22, claiming the package contained "curtain rods."

This bag, identified as "Q-10", was scientifically analyzed by the FBI, which told the Warren Commission that Q-10 was constructed from the same wrapping paper and gummed tape available in the TSBD shipping department November 22. On the basis of this, the Warren Report concluded that Oswald took paper and tape from the TSBD to Irving where he transferred the gun from its blanket wrapping to the paper bag.

Researcher J. Gary Shaw has recently discovered FBI documents which cast doubt on the credi-
